

INTRODUCING YOUR COMPLETE TABLET COMPUTING SOLUTION

STARGATE | BY XEPA

Ready to get your mobile professionals more efficient?

Introducing Stargate, the complete tablet computing solution from Google Enterprise partner Xepa. Get everything you need for total tablet productivity with an affordable monthly rental financial plan.*

The Stargate solution includes:

- Samsung Galaxy 10.1 tablet computer
- Preinstalled Google Apps including Gmail, Google Calendar, Google Docs, Google Sites, Google Talk and Google Plus
- Google Apps eLearning online training module
- 3G internet access (with 2GB data per month)
- Preinstalled Skype

The Samsung Galaxy 10.1 Tab

At the heart of *Stargate* is the Samsung Galaxy 10.1 tablet. CNET calls it 'the sexiest Honeycomb tablet we've seen' while TechRadar describes it as 'outstanding' and 'one of the best tablets yet to hit the shelves.'

The device is packed with features and benefits that drive better business, which include:

- NVidia dual-core processor for PC-like performance (including multitasking and Flash support)
- Google Android Honeycomb 3.1 operating system offers flexibility, thousands of apps
- Front (2MP) and rear (3MP) cameras enable high quality pictures and video conferencing
- Voice recording
- 8.6mm thin, 565g weight
- WiFi, Bluetooth and 3G connectivity, GPS navigation
- Stereo speakers, 1GB RAM, 32GB storage.
- All-day battery (7000mAH – estimated 10 hours use)

Stargate is designed for business

That's why Xepa has installed and configured a full suite of Google applications to get your people working smarter. The light weight, portability and great battery life of the Samsung Galaxy tab makes it the ideal companion to take with on sales calls, to executive meetings and any field work.

Collaborate, communicate, calculate, capture, create, record, share. The complete suite of applications on your *Stargate* Galaxy tab means you are instantly more productive, more mobile and more professional than ever before.

From doctors at the bedside to construction managers on site – the use-case scenarios for the efficiency and mobility of tablet computing are endless.

Stargate includes connectivity: 3G to WiFi

In the office? Your Samsung Galaxy will connect using your WiFi network. In the field? The Galaxy connects using 3G. With a generous 2GB of data, stay connected and stay productive all the time.

Take advantage of the cloud

Stargate is designed for the cloud. Online all the time, your email, documents, images and data are internet-stored for easy access and ultimate security and persistence. Even if you lose your device, your data is persistent and protected in the cloud.

Low acquisition cost with NO capital expenditure

Xepa has designed *Stargate* for affordability and tax-effective efficiency. With zero capital expenditure required, put the full power of tablet computing in the hands of your field workers for low cost monthly payments, all inclusive.
